

ABSTRACT OF THE DISCLOSURE**ACCESSIBILITY TO WEB IMAGES THROUGH MULTIPLE IMAGE
RESOLUTIONS**

5

A method, program and apparatus for providing access to alternate images in an electronic document are provided. The present invention comprises identifying an initial image to be displayed in an electronic document

10

(typically a web page) and then determining if alternate versions of the image are available for display. If

alternate versions of the image are available, they are provided within the same electronic document. The

alternate images differ from the initial image in size

15

and resolution, allowing users with visual impairments to access larger, higher resolution images. The user

accesses the alternate images by means of a selector displayed within the electronic document. When selected,

the alternate image replaces the initial image in the

20

electronic document, and the document is reformatted.
